

ECOMMERCE MANAGEMET PORTAL

.NET MVC 5 to .NET Core 10 & Angular 22

http://localhost:5187/swagger/index.html

The screenshot shows a web browser with two tabs: 'Swagger UI' and 'eCommerce Management Portal'. The address bar shows 'localhost:5187/swagger/index.html'. The Swagger UI header includes the Swagger logo, the text 'Supported by SMARTBEAR', a 'Select a definition' dropdown menu set to 'eComMgmtPortal v1', and a search icon. The main content area displays the API title 'eComMgmtPortal' with version '1.0' and 'OAS 3.0' specification. Below the title is the URL 'http://localhost:5187/swagger/v1/swagger.json'. The API endpoints are organized into two sections: 'Auth' and 'Cust'. The 'Auth' section contains two endpoints: a POST endpoint at '/api/auth/login' and a GET endpoint at '/api/auth/menu'. The 'Cust' section contains three endpoints: a GET endpoint at '/api/cust', a POST endpoint at '/api/cust', and a GET endpoint at '/api/cust/{id}'. Each endpoint is represented by a colored bar (green for POST, blue for GET) with a dropdown arrow on the right.
